

WIRELESS TRANSMITTER FOR USE IN A VEHICLE

Abstract of the Disclosure

A connecting device comprises a first power plug for
5 connecting to a power output port of a vehicle, a second power
plug for connecting to a power input port on an electronic
device, at least one signal plug for connecting to at least one
signal output port of the electronic device, wherein visual
signals and audio signals are received by the connecting device
10 through the at least one signal plug, and a wireless transmitter
for wirelessly transmitting the visual signals and the audio
signals to a receiver in the vehicle.
